Installation Guide

Made in USA

UL Tested and Classified for Fire and Smoke doors.

- * Seals against smoke, air and weather
- * Excellent compression; door latches easily

Installation Instructions

1. The surface temperature of the frame must be above 50°F for the adhesive to bond.
2. Clean frame with clean wipe provided to remove dust, oil, grease and dirt. Wax coated or high gloss painted surfaces may require roughening with a scotch brite pad or sand paper so adhesive will bond properly.
3. Measure and pre-cut pieces to fit the head and jambs.
4. Remove protective backing 1 to 2 feet at a time.
5. Position on where illustrated for application required.
6. Adhere seal by pressing firmly (15 lbs. of pressure required) along entire length of gasket. Do not remove and relocate.
7. Make sure the seal does not impede the proper closing and latching of door.

POSITIVE PRESSURE TESTED GASKETING MATERIALS
FOR FIRE DOORS
FOR APPLICATION TO HOLLOW-METAL-TYPE FIRE DOORS
RATED UP TO 3 HOURS AND WOOD-TYPE FIRE DOORS
RATED UP TO 1-1/2 HOURS.
